EXPERIENCE

Software Engineer (R&D)	TVS Motor Company	Jul 2023 – Present
- Implemented and validated AUTOSAR application architecture complying with ISO 26262 - Functional Safety, SAE J3061 - Cybersecurity Standards, ASPICE and integration for the whole Infotainment System platform, completing virtual, BSW integration, and system-level tests to ensure robust performance. - Developed a Deep Learning model - Based Rider Scoring and Recommendation System with 98.6% accuracy, integrating 50 parameters into scalable MCU firmware and delivering an Android application for behaviour analysis increasing customer engagement. - Designed and implemented dynamic regression model for Remaining Time to Charge estimation with 99.1% accuracy, achieving seamless integration into MCU firmware by converting into tflite model. - Spearheaded algorithm development for Adaptive Cruise Control (ACC), from camera input using computer vision with 95.3% accuracy and implementing on evaluation board integrated into vehicle with real time processing delighting and protecting customer. - Engineered Python-based GUI automation tools for project end to end code generators, infotainment dashboards, streamlining software development and testing workflows saving months of time and with more ease to integrate modifications. - Strengthened intellectual property portfolio by filing 10+ invention disclosures and delivering robust software for standalone telematics units while adhering to timelines following Agile methodology.		
Computer Vision Research Intern	TiHAN-IIT Hyderabad	Nov 2022 – May 2023
- Developed computer vision algorithms for monocular depth analysis in GPS-denied AGV navigation. - Predicted object direction, speed, future trajectory, and occlusion metrics using a custom dataset.		
Teaching Assistant	IIITDM Kancheepuram	Aug 2021 - May 2023
- Assisted in courses on Digital System Design, C & Data Structures, Data Science, and Computer Vision. - Facilitated lab sessions and mentored students on course projects.		
Machine Learning Intern	Swecha	Mar 2019 – Jul 2019
Developed a website Find Your Group using K-Means Clustering for social networking.		

EDUCATION

Chennai, India	IIITDM Kancheepuram	2021 – 2023
- MTech in Computer Science & Engineering spl. in Data Science and Artificial Intelligence, CGPA of 9.05. - Published “Perspective Distortion Model for Pedestrian Trajectory Prediction for Consumer Applications” in IEEE Transactions on Consumer Electronics. - Relevant courses: Pattern Recognition, Digital Image Processing, Computer Vision, Deep Learning, Advanced Data Structures and Algorithms.		

- Certifications: IIT Madras NPTEL ELITE (Machine Learning, Reinforcement Learning), Stanford Workera (Machine Learning and Deep Learning Researcher).

Hyderabad, India

Malla Reddy College of
Engineering & Technology

2017 - 2021

- B.Tech. in Computer Science & Engineering, CGPA of 8.40.
- Co-founded the Programming Club, organized workshops on Machine Learning and Blockchain.
- Relevant courses: Data Structures and Algorithms, Programming in C, Artificial Intelligence, Data Mining.

ACADEMIC PROJECTS

- **Visual Surveillance:** Developed modules for real-time face detection and pedestrian property analysis for autonomous vehicles.
- **Fundus Denoising Autoencoder:** Implemented autoencoders to remove noise from fundus images.
- **Draw In Air:** Utilized OpenCV to capture and display air-drawn images on a computer screen.
- **Detecting Manufacturing Defects:** Employed CNNs for automated production quality control.

ADDITIONAL LIFE EXPERIENCE

- Distinguished Speaker, reviewer, session chair, hackathons organizer, member in IEEE Vehicular Technology Society and reviewer of IEEE journal Intelligent Transportation Systems.
- Coordinator for high-end workshops on computer vision at IIITDM Kancheepuram.
- Teaching volunteer at U&I, an NGO for underprivileged children.

TOOLS AND TECHNOLOGIES

- **Programming:** Python, Embedded C, MATLAB, Data Structures, OOP.
- **Tools:** System Desk, Davinci stack, S32, PCAN, CANoe, CANape, Vector Log Exporter, Android Studio, Jira, Bitbucket, Visual Studio, Anaconda, Spark, IBM ELM.
- **Domains:** ADAS/ARAS, Automotive Infotainment Embedded Software, Computer Vision, Patenting.
- **Libraries:** OpenCV, TensorFlow, Dlib, Imutils, Matplotlib, Sklearn, cantools.
- **Methodologies:** Project Life Cycle Management, Agile Framework, AUTOSAR.
- **Certifications:** AUTOSAR 4.0 Classic Platform by Vector, Leadership Competencies: Leading Self by Harappa, technologies certification by Udemy and LinkedIn learning.

AWARDS AND RECOGNITION

- Institute award for the highest CGPA in MTech, CSE from IIITDM, Kancheepuram.
- Beacon of Excellence Award - Best Business Impact Solution, TVS R&D Software CoC Hackathon 2023.
- Beacon of Excellence Award - Best Audio-Visual, TVS R&D Software CoC Hackathon 2023.
- INSPRO Quiz 2024 winner - Knowledge in Intellectual Property.
- Learning Enthusiast Award - Enthusiastic completion of technical and non-technical courses.
