

EDUCATION

Graduation (Computer Science) | **IIITD&M Kancheepuram** | 2019 – 2024 | CGPA: 8.7

Higher Secondary | **Jenkins School** | 2017 – 2019 | CGPA: 9.4

EXPERIENCE

Software Engineer | **Trimble** | Full Time | June 2024 – Present

- Resolved an **IPC** issue during **DDS discovery** and implemented dynamic network selection for seamless communication.
- Fixed 80+ Clang warnings, improving code quality and ensuring compliance with coding standards.

Software Developer Intern | **Reverr** | Internship | June 2023 – Sept 2023

- Developed responsive user interfaces using **React.js** and **React Native**.
- Work with **Redux** for efficient state management and **Firebase** as a backend solution.
- Collaborated with cross-functional teams to deliver seamless integration.

Android Developer Intern | **AppLib Group** | Internship | Oct 2021 – Feb 2022

- Developed niche software solutions with **limited online resources**.
- Developed **libraries** for Harmony OS (by Huawei), gaining valuable experience in emerging platforms.
- Successfully converted **Android libraries** to Harmony OS libraries, ensuring compatibility.
- Developed and maintained the these **Harmony OS** libraries: [TitleLayout](#), [PercentVisibleLayout](#).

PROJECTS

Parallelization of Pixelor (*Profiling, OpenMP, and MPI, C++*) 

- Worked on the Pixelor project, a large-scale image processing application. Identified performance bottlenecks in the Pixelor application using profiling tools such as GProf, GCov.
- Used OpenMP and MPI, leveraging shared memory and distributed computing to improve performance.
- Decreased execution time by 6x, resulting in improved user experience.

Attenda (*React Native, Expo go, Type script*)  

- Developed Attenda, an application that automates attendance tracking using WiFi and hotspot technology.
- Collaborated with a team of developers as the front-end designer and developer, utilize Figma.
- Utilized Notion and Trello to manage the project workflow and progress tracking.

My Ebook (*Android, Firebase storage, Firebase database, Java*) 

- Developed My Ebook, aimed at providing a centralized platform for academic study materials.
- Implemented a wide range of functionalities, including the ability to choose specifications, download, upload, arrange, read, and delete study materials.
- Leveraged Firebase to efficiently store and retrieve data, ensuring seamless access for users.

Work List web application (*MERN stack*) 

- Developed a Work List web application using the MERN stack (MongoDB, Express, React, and Node.js), implementing CRUD (Create, Read, Update, and Delete) functionality to enable users to manage their contacts.
- Designed and implemented the backend Rest API and frontend user interface.

LEADERSHIP

- Collaborated closely with the CTO. Led a team of three members during the last two months at Reverr.
- Effectively assigned tasks and ensured equitable work distribution while minimizing conflicts.
- Demonstrated strong project management and leadership skills.

SKILLS & ACHIEVEMENT

- Coding:** Practiced 600+ questions in C++ on [leetcode](https://leetcode.com/).
- Relevant Courses:** Operating Systems, Database Management, Computer Network, DSA, OOPs
- Technology/Frameworks:** Android, React Native, ReactJS, Node.js, MongoDB, Firebase, Linux, Jenkins
- Programming Language:** C/C++, Java, Python, JavaScript, Type Script, PHP, HTML/CSS, SQL
