EDUCATION

- **IIIT Design & Manufacturing, Kancheepuram** India
B.Tech – Computer Science & Engineering (Artificial Intelligence) | GPA: 3.2/4.0 *Expected May 2027*
 - ML, Deep Learning, NLP, Applied Data Science, DBMS, Statistics & Probability, Pattern Recognition

EXPERIENCE

- **Yellow.ai** Abu Dhabi, UAE
Artificial Intelligence Intern *May 2025 – Jul 2025*
 - **NLP Classification:** Shipped an **NLP text classification system (92% accuracy)** with entity resolution and structured labelling pipelines over 100K+ conversational records; reduced manual review time by **40%**.
 - **ETL & APIs:** Built async ETL pipelines cutting processing latency by **35%**; deployed REST APIs serving **500K+ MAU** at p99 < 200ms using **Docker**-based microservices. [[Cert](#)]
- **SwitchIT** Remote
AI Engineer Intern *Sep 2025 – Present*
 - **Agentic Workflows:** Built **15+ production agentic workflows** with multi-tool orchestration, **LangGraph**-style state machines, and event-driven scheduling; leveraged **Claude Code** for full agentic lifecycle management, cutting prototyping time **10x**.
 - **LLM & Document Intelligence:** Integrated **Claude/local LLM** backends for conversational reasoning over structured data; implemented document-aware pipelines with sandboxed execution and safe approval flows. [[Cert](#)]

PROJECTS & RESEARCH

- **Two-Stage FDI Attack Detector – Transformer & Sequence Modelling:** NARX + Attention Bi-LSTM on ACN-Data-Static (85K+ sessions) with Isolation Forest + CUSUM; engineered features. **97.9% F1, 99.9% recall. (In the process of publication)** [[GitHub](#)]
- **SwitchIT – Microservices Career Platform with Agentic AI Companion:** Full-stack marketplace with **Darshan** – tool-augmented LLM agent (Groq llama-3.3-70b), two-pass agentic loop, proactive cron outreach, **RAG pipeline** (text-embedding-3-small + **pgvector** HNSW). Stack: Fastify, Express, PostgreSQL, Redis, **Elasticsearch**, Supabase Realtime, OpenAI Vision API, React 18 + TypeScript. Built end-to-end using **Cursor** and **Claude Code**. [[Architecture Doc](#)]
- **SafeKeeper – On-Chain Liquidation Insurance Protocol:** Trustless **Solidity** insurance protocol (InsurancePool, PolicyRegistry, Pricing) on Shardeum Testnet with real-time liquidation monitoring, automated payouts, and **ZK proof** integration in progress. Stack: Node.js, Prisma, PostgreSQL, React 18, Wagmi v2, Viem. **2nd Place – ETH India Defy '26**. [[GitHub](#)] [[Live Demo](#)]

ACHIEVEMENTS & CERTIFICATIONS

- **Top 100 Nationally – Amazon ML Challenge 2025:** 70,000+ participants; **#1** at IIITDM Kancheepuram. [[Cert](#)]
- **1st Runner-Up – ETHIndia Defy '26 Hackathon:** Built **SafeKeeper**, an on-chain insurance protocol protecting leveraged traders from liquidation losses by covering market risk from volatile price movements. [[Cert](#)]
- **Winner – AI/ML Hackathon, IIITDM Kancheepuram 2024:** Electricity forecasting model with **R²=0.998** using ensemble learning on time-series data (48hr). [[Cert](#)]
- **Certifications:**
 - **Google Cloud** – Transformer Models & BERT **Anthropic** – MCP (Intro + Advanced), Subagents, **Claude Code**, AI Fluency [[Certs](#)]

TECHNICAL SKILLS

- **AI Tooling & Dev Acceleration:** **Claude Code** (agentic lifecycle, multi-tool orchestration, full-stack scaffolding), **Cursor** (AI-native IDE, codebase-aware edits, multi-file refactors), **Antigravity**, GitHub Copilot – daily driver across all projects
- **ML & NLP:** **Transformers**, **Attention Bi-LSTM**, **BERT**, Hugging Face, RAG, Vector Search (pgvector, Pinecone, Qdrant), Text Classification, Entity Extraction, Seq2Seq, RL
- **Frameworks & Infra:** PyTorch, Scikit-learn, LangGraph, PydanticAI, Stable-Baselines3, Docker, FastAPI, Flask, Node.js, PostgreSQL, Elasticsearch, Redis
- **Languages:** **Python** (primary), JavaScript/TypeScript, SQL | **Spoken:** Telugu, Tamil, English, Hindi, French
